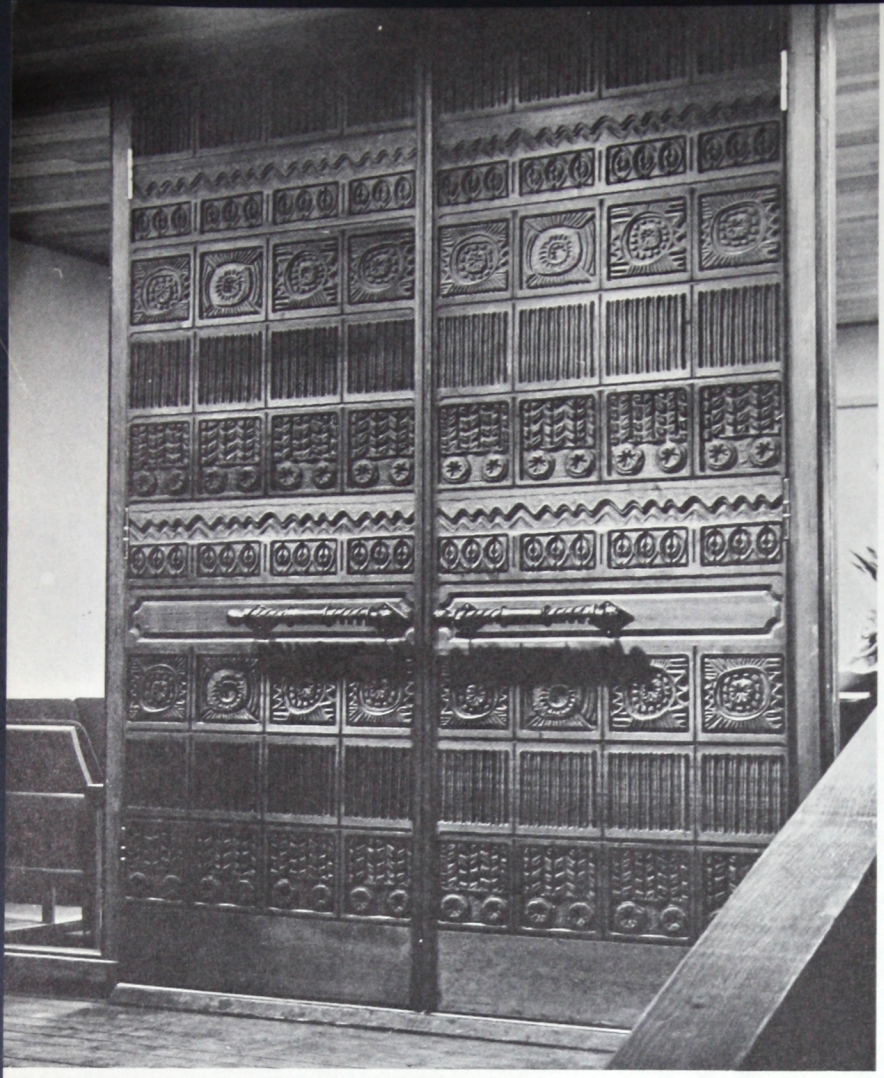
PANELCARVE



Carved modular wood panels for doors . . . furniture . . . architectural details . . . headboards . . . wall hangings . . . paneling . . . and other decorative applications.

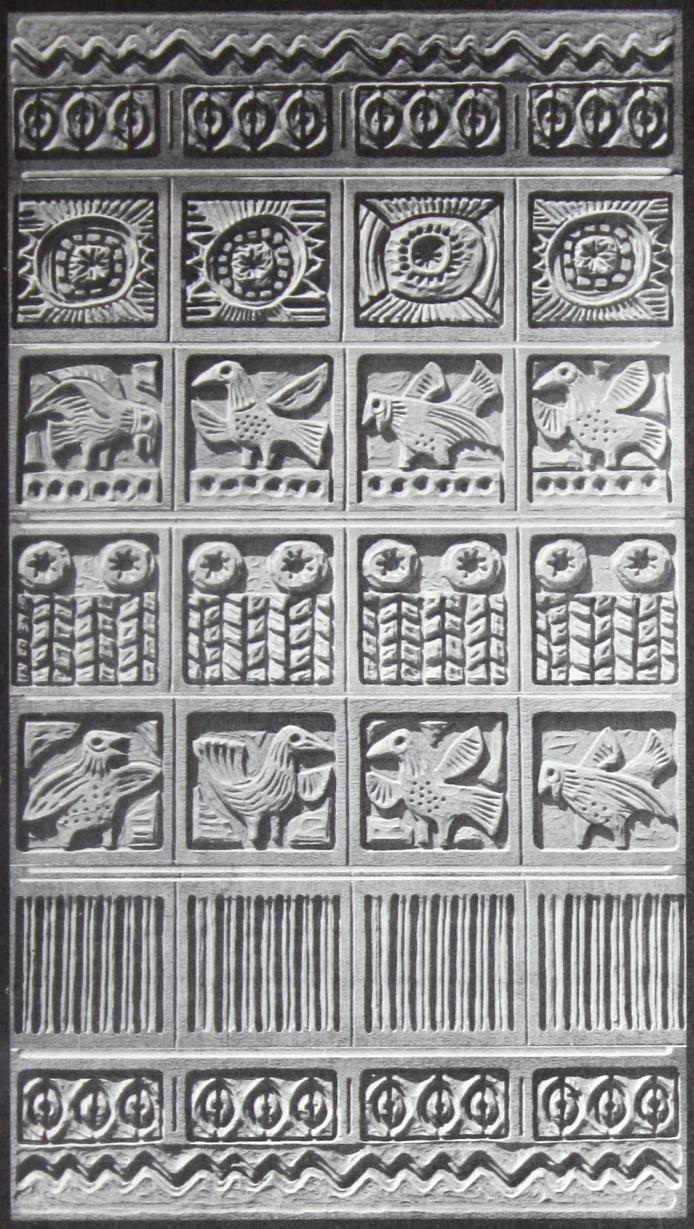
Carved from kiln-dried, all heart redwood 1 1/16 inch in thickness, with a tongue-and-groove detail to permit easy assembly into an infinite variety of overall designs.

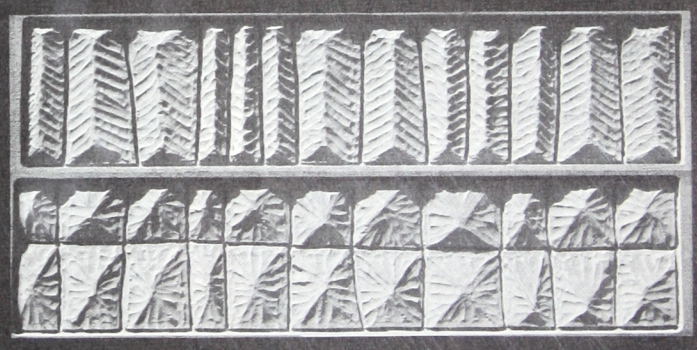
Panels are treated to give a dark brown aged appearance, but are not sealed or finished. The color varies from panel to panel, depending on the character of the wood. Some finish or preservative is recommended, but the panels can be left to weather and age in their natural state.

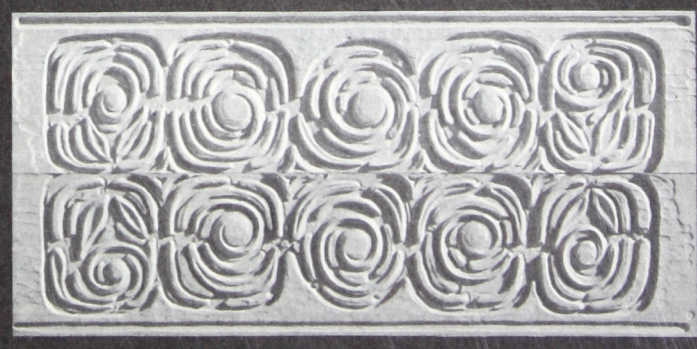
PANELCARVE

BOX 5215 SANTA BARBARA CALIFORNIA

Telephone (805) 969-0916







All panels 9" x 36" except as noted

Panels are usually applied to background by spot gluing and nailing through the tongue detail. Place tongue detail upward and groove downward. Waterproof glue is recommended for exterior use. Lumber core or novaply core plywood is recommended for backing. Philippine mahogany is frequently used for the hardwood trim.
